How to close out a study in iStar:

1. Start in “My Activities” on study main landing page. Scroll down to the last option.

2. This box will open and you should complete all sections.

3. Once you answer the questions and click OK, the study will be officially closed out. Note that answering YES to 1, 4, or 6 will not allow you to submit, so make sure to take care of those issues beforehand.
