Institutional Review Board
Waiver or Alteration of Informed Consent
for
Minimal Risk Clinical Investigations
Objective:

Update IRB Staff and Members to FDA’s regulatory change
New Rule issued by FDA on 12/21/2023

In alignment with 2016 Cures Act for FDA to “harmonize differences between the HHS Human Subject Regulations and the FDA Human Subject Regulations,” to the extent practicable and consistent with other statutory provisions

Rule harmonizes with the Common Rule’s requirement under 45 CFR 46.116(f)(3)

FDA will withdraw previous guidance document from 2017 that allowed waiver/alterations until the final rule was issued

Rule effective on 1/22/2024
The New Rule

• Allows an exception from the requirement to obtain informed consent when a clinical investigation poses no more than minimal risk to the human subject and includes appropriate safeguards to protect the rights, safety, and welfare of human subjects.

• Permits an IRB to waive or alter certain informed consent elements or to waive the requirement to obtain informed consent, under limited conditions, for certain FDA-regulated minimal risk clinical investigations.
Resultant changes to

- 21 CFR 50.20 – General requirements for informed consent
- 21 CFR 312.60 – (Drugs) General responsibilities of investigators
- 21 CFR 812.2 – (Devices) Applicability
21 CFR 312.60 – (Drugs) General responsibilities of investigators

An investigator is responsible for ensuring that an investigation is conducted according to the signed investigator statement, the investigational plan, and applicable regulations; for protecting the rights, safety, and welfare of subjects under the investigator’s care; and for the control of drugs under investigation. An investigator shall, in accordance with the provisions of part 50 of this chapter, obtain the informed consent of each human subject to whom the drug is administered, except as provided in §§ accordance with part 50:23 or 50:24 of this chapter. Additional specific responsibilities of clinical investigators are set forth in this part and in parts 50 and 56 of this chapter.

21 CFR 812.2(b)(1)(iii) – (Devices) Applicability

Ensures that each investigator participating in an investigation of the device obtains from each subject under the investigator’s care, informed consent under part 50 and documents it, unless documentation is waived by an IRB under § 56.109(c) in accordance with part 50 of this chapter.
**21 CFR 50.22**  Exception from informed consent requirements for minimal risk clinical investigations.

The IRB responsible for the review, approval, and continuing review of the clinical investigation described in this section may approve an informed consent procedure that does not include or that alters some or all of the elements of informed consent set forth in § 50.25(a) and (b), or may waive the requirement to obtain informed consent, provided the IRB finds and documents the following:

(a) The clinical investigation involves no more than minimal risk to the subjects;

(b) The clinical investigation could not practicably be carried out without the requested waiver or alteration;

(c) If the clinical investigation involves using identifiable private information or identifiable biospecimens, the clinical investigation could not practicably be carried out without using such information or biospecimens in an identifiable format;

(d) The waiver or alteration will not adversely affect the rights and welfare of the subjects; and

(e) Whenever appropriate, the subjects or legally authorized representatives will be provided with additional pertinent information after participation.
